

# Village of Ruidoso

---

---

**Date: December 8, 2011**

**Public Service Announcement- Water Loss**

**Village of Ruidoso – Water & Sewer Information**

**The Village of Ruidoso is experiencing higher than normal water demand.**

**The recent low temperatures have caused water lines to freeze and with the temperatures warming up it may cause lines to burst.**

**The Village of Ruidoso is asking that all residents check their lines for leaks and report them to the water department as soon as they are discovered; and that the residents assist the Village in reporting any water leaks that they may come across while out on the streets**

**The Village of Ruidoso employees are out looking for leaks and will be going from meter to meter.**

**For further information call the Water & Sewer Dept at 575-257-2386.**
